

I/P Converter

Replacement I/P for Siemens (Moore) 760E Positioner

January 5, 2016

I/P for Siemens (Moore) 760E Positioner

Drop in replacement spare part I/P converter
Part number: 7958070

There are thousands of Siemens (Moore) 760E Positioners installed worldwide in various industries, these all use the ABB OEM I/P converter module, also known as the SENSYCON I/P.

This I/P module is available to all our sales and distributors to sell as a spare part for the model 760E Positioner.

Part number for the I/P module is: 7958070

During the last few years Siemens made a decision to use a low cost I/P from another vendor for their model 760E electro-pneumatic positioner, this low cost I/P does not offer the same performance as the proven ABB (SENSYCON) I/P. In some cases customers are not willing to accept the low cost I/P and would like to purchase the original.

The ABB (SENSYCON) I/P can be identified by the Type number 22/06-65 marked on the label, the Input is 4-20mA, Output 3-15psi, and Supply pressure 20-150psi. The I/P part number **7958070** is a “drop-in” replacement, the existing O-rings on the 760E interface manifold need to be reused.

For any questions or request for prices and availability please contact your local ABB sales representative or single point of contact.

Happy Selling
