And the Expertise to Apply Them

Since 1966, BSI Controls has been working to bring the best in reliable control equipment and technology to its customers. We take pride in helping our customers with the specification and selection of products as well as providing after-the-sale support.

Over the years, our staff has gained extensive process control experience at major instrument suppliers. That experience allows us to not only supply a product, but to work with you to specify the optimum solution for your process application.
